1.2 Company profile

Agroliga Group ("Group") is Ukraine based company conducting food and agricultural business. The Group produces sunflower oil, grain and breeds milk cows. The Group consists of six companies:

- Agroliga Group PLC – the holding company based in Cyprus;
- Agroliga operating in Ukraine. It conducts plant production;
- Mechnikovo operating in Ukraine. It specializes in milk cows breeding and plant production;
- Agrokom Novaj Vodolaga operating in Ukraine. It conducts sunflower oil production;
- PLC Liga A operating in Ukraine. It focuses on sales and trading services for other companies in the Group.
- Group of Companies Agroliga LLC– the holding company based in Ukraine.
- VostokAgroKontrakt operating in Ukraine. It conducts plant production;
- Maiak operating in Ukraine and conducts plant production. It was added to Group in August 2015.

1.3 Management Board

Aleksander Berdnyk - Chairman of the Board of Directors

Bizserve Investments Limited – Member of the Board of Directors

Bizserve Management Limited – Member of the Board of Directors

1.4 Shareholder structure

Table 1 - The Shareholding structure of the Issuer, indicating shareholders holding at least 5% of the votes at the date of report (as of 14/11/2015)

Stockholder	Number of shares	Number of votes at the general meeting	Participation in share capital	Participation in the total number of votes at the general meeting

Statements were prepared according rules of IAS 34. There were no changes in accounting policy of the Group during period 01/01/15-30/09/15. More detailed Group's accounting policy is described in audited annual report of the Group.

Exchange rate effect was noted in Statement of financial position.

Statements based on annual audited report and comparative data may slightly changes from quarterly reports because of auditor's corrections and reclassifications.

3. The Board of Directors' report.

3.1 Comments to the financial results.

In 3 quarter of 2015 Agroliga noted EUR 16 799 thousand revenues and 2 077 thousand net profit. Compared to the same period of the previous year, revenues increased by EUR 5 425 thousand and net profit decreased by EUR 417 thousand.

Chart 4 Selected financial data for the 3^d quarter of 2015, together with data for 2014 [EUR M]

Source: Issuer

The decreasing of Group's revenue in 3^d quarter 2015 is a result of global crops prices decreasing, and several export deals in progress, as well as increasing of the net profit.

3.2 Description of the most important events of the 3^d quarter.

Agro season finished.

At this quarter Agroliga finished agricultural season. At the next table shown results of the crops harvest.

Table 6

Harvest of the agricultural season 2014-2015

Year	Crops	Sown, ha	Harvested, tons	Yield, t/ha
2015	Winter wheat	1 985	7 745,80	3,90
2015	Wheat	339	683,20	2,02
2015	Barley	541	1 958,80	3,62
2015	Winter barley	191	682,80	3,57
2015	Maize	112	730,30	6,52
2015	Sunflower	1 983	8 620,80	4,35
2015	Winter rapeseed	485	1 101,80	2,27

Вторая половина лета и начало осени в Украине по гидротермическому режиму оказались недостаточно благоприятными для развития яровых и озимых культур, оказав некоторое негативное влияние на валовый сбор. Тем не менее, благодаря своевременно проведенным агротехническим мероприятиям, удалось получить высокий урожай, см. таб. Так хотелось бы отметить позитивный опыт по возделыванию высокоолеиновых гибридов подсолнечника. В текущем сезоне, активность торгово-закупочной деятельности на него оценивается как очень высокая, и несмотря на сравнительно меньший показатель урожайности в 39 ц/га, анализ образцов дал среднюю массовую долю олеиновой кислоты к общей доле жирных кислот в - 85%, что удовлетворяет требованиям ГОСТа и, следовательно, рыночная цена на урожай такого подсолнечника выше, в текущем сезоне примерно на 13%.

Также благодаря своевременно проведенной уборочной кампании, уже к 20 числам сентября удалось завершить сев озимых культур. В текущем году под озимые выделено 2800 Га. На сегодняшний день состояние посевов озимой пшеницы и других озимых можно охарактеризовать как удовлетворительное.

Conditions at the second half of the summer and early autumn in Ukraine were not sufficiently favorable for the development of spring and winter crops, that had some negative impact on the gross yield. Nevertheless, thanks to the timely implementing of agro-technical measures, Agroliga managed to get the highest yield. Also should be mentioned a positive experience for

the cultivation of high oleic sunflower hybrids. In the current season, the activity of high-oleic sunflower trading is assessed as very high, and despite the relatively lower rate of productivity of 39 t / ha, the analysis of the samples gave an average weight fraction of oleic acid to the total share of fatty acids - 85%, which meets the requirements of standards and consequently the market price of such a sunflower crop above the current season by about 13%.

Also, thanks to the timely conduct of the harvest, by the 20th of September we reported about completing the sowing of winter crops. This year, for winter crops allocated 2800 hectares. To date, the state of winter wheat and other winter crops can be described as satisfactory.

New company aquisition.

Agroliga Group PLC reports completing transaction on the acquisition of corporate rights to one more agro-industrial enterprise. The fourth agricultural producer LLC "Maiak" was added to Agroliga Group.

The enterprise specializes in the cultivation of wheat, barley, corn and sunflower, also winter rape is included in the structure of crop rotation in 2015/2016 marketing year.

LLC "Maiak" is situated in close proximity with the regional centre, city of Kharkiv. The enterprise processes more than 1.8 thousand ha.

3.3 Situation in Ukraine.

In connection with recent changes in Ukraine's political and economic situation, there is a need to comment on their impact on the operations of the Group companies.

Hryvna devaluation.

Despite significant rate shocks caused by political events and significant rising euro rate against hryvna for the last year, National Bank of Ukraine demonstrates the ability of to control the situation.

From 1 January 2015 and up to 30 September 2015, the Ukrainian Hryvnia (the «UAH») depreciated against EURO by approximately 25%. The NBU imposed certain restrictions on

purchase of foreign currencies, cross border settlements (including repayment of dividends), and also mandated obligatory conversion of foreign currency proceeds into UAH.

Currently, all the Agroliga's loans are denominated in local currency, while the price of sales of agricultural products mainly tied to the euro or US dollar. Thus devaluation will reduce the finance and other costs in the cost structure.

Raising capital in the foreign markets.

The group planned to raise additional financing on the WSE in the 1st quarter of 2014, simultaneously with the transition to the upper market. Due to the stock prices instability of Ukrainian companies associated with the dynamic political situation in Ukraine, these plans has been postponed, but not canceled. Once the market calms down, Group will return to this issue.

The initial stage of development program 2013-2015 does not require substantial investments, and the Group is proceeding with his own funds.

Changes in taxation.

According memorandum with IMF, government should bring the agriculture sector fully under the general VAT regime in line with international practice, effective January 2016, but there are any changes in legislation made yet.

Risk of military activity.

Anti-terroristic operation in Donetsk and Lugansk regions paused after peace talks in Minsk under the auspices of the Organization for Security and Co-operation in Europe (OSCE), Ukraine, Russia, the DPR, and the LPR agreed to a ceasefire on 15 February.

In any event all the Group's land plots are located in the Kharkiv region, where there are no proposals for any territorial changes, and no military activity was held or planned at this region.

Decline in living standards and changing markets.

The main market for Agroliga's crops is export. Significant changes in the export market does not happen, the denomination of the hryvna will allow to speak of obtaining additional profits from exchange rate differences. Logistically main point of export for the partners of the group now is either Nikolaev or Odessa, both located in southern Ukraine. Changes in quotas or export rules are not announced by the new government.

The main sales market for crude sunflower oil is the East and Centre of Ukraine - confectioneries, manufacturers of mayonnaise, sauces and refined oil. They mainly produce low-end products, the demand for which varies only slightly with the worsening economic situation, so no significant change in the projected volumes and sales prices. Price and volume of oil going for export, similarly projected grain exports.

Milk is supplied to local dairies for processing. No significant change in the projected volumes of its sales estimated. But we should point, that Russia is a target market for large milk exporters, and with their difficulties milk prices going down. But milk revenue is less than 10% of total Group's revenue, and no significant influence connected with it estimated.

3.4 Developing of the strategy.

Strategy of the Group for 2013-2015 years was published 12/06/13 and is conducting conduct in three areas:

1) One of the main part of this strategy is developing oil refinery and significant increasing this segment in result of company. Agroliga Group will be conduct this task by increasing capacity from 55 000 tons to 70 000 tons in 2015 and - up to 100 000 tons until 2017 accordingly. Agroliga plans to be produce more profitable products through implementation of new technology of oil extraction and in the long term perspective starting of bottling oil.

2) Agroliga Group plans to be mostly use own sunflower seeds for production what allow to better control prices of raw material and finally to achieve a better margin. For this Company will be expand land bank to 12,3 thousand ha and will be actively working for significant increasing of efficiency and yields crops.

As a part of realization of this strategy in August 2015 Group obtained another agricultural company with land plot 1,8 thousand ha.

3) Company will be also develop dairy farm. Besides significant increasing of cowherd to 1400 cows Agroliga will be establish production of processing products. In plan of company is a starting dry milk and soft cheese.

As a step to realization of this point was opened retail dairy shop during August 2015.

Because of significant changes in Ukraine, the Group is working on adjusting forecasts and Group's development strategy. There are no major changes planned, but terms of realization and details will be reviewed.

3.5 The Board's opinion about the achieved results and the forecasts.

Because of changes in prices, exchange rates and overall situation in Ukraine Group cannot make any long-term financial forecasts for 2015 year.

Aleksandr Berdnyk
Chairman of the Board of Directors
