### Commentary of the President of the Management Board Wolfgang Lübbert to the results for the first quarter of 2014

The situation on the paper market remains difficult. In the 1st quarter of 2014, it saw a significant decline in prices: 3.5% for coated paper and 5.4% for uncoated paper. Year-on-year the market grew slightly in volume, 0.8% according to Euro-Graph from April 2014.

On this still highly competitive market, Arctic Paper had a decline in paper sales of 3.8% year-on-year (partly related to the above-mentioned closure of one paper machine last summer), and compared to the 4th quarter of 2013 the

company generated growth in paper sales of 7.1% (mainly due to the seasonal effect).

Meanwhile, some positive market trends in pulp prices, slightly visible in the 4th quarter of 2013, continued in the 1st quarter of 2014. Exchange rates, particularly SEK/EUR, were at a level neutral to the company.

Arctic Paper continues to implement its restructuring plan begun in the 2nd half of 2013, with the objective to stimulate sales, reduce costs and strengthen the group's financial

position. Consequently, in terms of operations on the paper market in 1Q 2014, Arctic Paper generated EBITDA of PLN 32m (up 16.6% on a year-on-year basis) and net profit of PLN 2.3m (compared to a loss of PLN 2.6m in 1Q 2013), on revenues of PLN 616.6m (down 3.8% compared to 1Q 2013).

The use of production capacity in the Arctic Paper mills remained at 93%.

The operations of Rottneros developed well during the first 3 months of 2014 and the company contributed to the Arctic Paper Group's results with EBITDA of PLN 16.4m in 1Q 2014.

In the second half of 2013, Arctic Paper began implementation of its restructuring plan, aimed at stimulating sales, reducing costs and strengthening the group's financial position. # Relevant information and factors influencing financial results and evaluation of financial standing

## Key factors affecting the performance results

The Group's operating activity has been historically and will be influenced by the following key factors:

- macroeconomic and other economic factors;
- paper prices;
- prices of pulp for Paper Mills, timber for Pulp Mills and energy prices;
- currency exchange rates fluctuations.

### Macroeconomic and other economic factors

We believe that a number of macro-economic and other economic factors have a material impact on the demand for high-quality paper, and they may also influence the demand for the Group products and our operating results. Those factors include:

- GDP growth;
- net income – as a measure of income and prosperity of the population;
- production capacities – oversupply lingering in the segment of fine papers and decline of margins on paper sales;
- paper consumption;
- technological development.

### Paper prices

Paper prices undergo cyclic changes and fluctuations, depend on global changes in demand and overall macroeconomic and other economic factors, as those indicated above. The prices of paper are also influenced by a number of factors connected with the supply, primarily changes in production capacities at the worldwide and European level.

### Costs of raw materials, energy and transportation

The main elements of the Group's operating expenses are costs of raw materials, energy and transportation. The costs of raw materials include mainly the costs of pulp for Paper Mills, timber for Paper and Pulp Mills and chemical agents used for

paper and pulp production. Our energy costs, historically, include mostly costs of electricity, natural gas, coal and fuel oil. Costs of transportation include the costs of transportation services rendered to the Group mainly by external service providers.

Taking into account the share of these costs in total operating expenses of the Group and the limited possibility of controlling these costs by the Company, their fluctuations may have a significant impact on Group's profitability.

Part of pulp supplies to our Paper Mills is realized from our Pulp Mills. The rest of pulp produced in Pulp Mills is sold to external customers.

### Currency exchange fluctuations

Our operating results are significantly influenced by currency exchange rates fluctuations. In particular, our revenues and costs are expressed in different foreign currencies and are not matched, therefore, the appreciation of currencies in which we incur costs towards currencies in which we generate revenues, will have an adverse effect on our results. We sell our products in all EURO zone countries, the Nordic countries, Poland and UK; therefore, our revenues are to a great extent expressed in EUR, GBP, SEK and PLN, while the revenues of Pulp Mills are primarily dependent on USD. The Group's operating expenses are primarily expressed in USD (pulp costs for Paper Mills), EUR (costs related to pulp for Paper Mills, energy, transportation, chemicals and a majority of costs related to the operations of the Mochenwangen paper mill), PLN (the majority of other costs incurred by the mill in Kostrzyn nad Odrą) and

SEK (the majority of other costs incurred by the Munkedal and Grycksbo mills as well as Rottneros and Vallvik pulp mills).

Exchange rates also have an important influence on results reported in our financial statements because of changes in

exchange rates of currencies in which we generate revenues and incur costs, and the currency in which we report our financial results (PLN).

## Unusual events and factors

The average exchange rate in the first quarter of 2014 was 4.3% higher than in the corresponding period of 2013.

These changes mean that in the first quarter of 2014 a depreciation of SEK towards EUR occurred, however, only at the end of the quarter so the influence of these changes was minor and the Group did not record higher revenues in Swedish facilities on these grounds. The change of EUR/SEK exchange rate has a positive impact on financial results of the Group, when compared to the first quarter of 2013, as the depreciation of SEK towards EUR contributed to more than 4% increase of sales income generated by Swedish mills that are dependent on prices expressed in EUR.

compared to 4Q 2013 and decreased by 0.5% compared to 1Q 2013.

The share of pulp costs in cost of paper sales in the first quarter of 2014 amounted to 43.5% and was lower compared to the level recorded in 4Q 2013 (48.5%).

## Factors influencing the financial results in the perspective of the next quarter

Material factors, which have an impact on the financial results in the perspective of the next quarter, include:

- Demand for fine papers in Europe. In 2013 there was a significant decline of demand for fine papers in Europe (based on levels of supplies realized) compared to 2012. Further adverse turnout of market situation will unfavorably influence levels of orders to our Paper Mills and, as a result, will have an adverse impact on financial results of the Group.
- The levels of fine papers prices. In particular, the ability to raise the prices of Arctic Paper products in local currencies, in reference to diminishing deliveries/demand in Europe and in connection with exchange rates fluctuations, will have a material influence on the financial results. Paper prices are going to be of particular importance for paper mills of Grycksbo and Mochenwangen, which, in connection with market changes, experience the greatest adverse impact of changes of sales volume, prices, as well as, in case of AP Grycksbo, of exchange rates fluctuations.
- Prices fluctuations of raw materials, including pulp for Paper Mills and electricity for all operational entities. In particular, financial results of Paper Mills may be adversely influenced by increasing pulp prices, particularly BHKP. On the other hand, increasing NBSK prices should positively influence financial results of Pulp Mills. Fluctuations of electricity prices in Sweden may also have a material impact on the results achieved by the Group. In future, such market changes may translate to changes of sales profitability in paper mills of AP Munkedals and AP Grycksbo as well as in pulp mills of Rottneros and Vallvik.
- Currency rates; in particular, the appreciation of PLN and SEK in relation to EUR and GBP, the appreciation of PLN in relation to SEK, and depreciation of PLN and SEK in relation to USD, may have an adverse effect on the financial results. However, our Pulp Mills may benefit from appreciation of USD in relation to SEK.

## Risk factors

- submission to enforcement on the basis of art. 97 banking law (separate in favor of each bank) - Arctic Paper Kostrzyn S.A and Arctic Paper S.A.

Apart from the aforementioned guarantees, Arctic Paper Mochewangen GmbH has a contingent liability in the amount of EUR 7,489 thousand connected with exercising the benefit of lowered electricity costs in 2012 and 2013. Lower charges for electricity had been offered by German state authorities on the grounds of support granted to companies which used renewable sources of energy. Currently the European Union considers if such help is compliant with EU law. German government claims that no infringement of EU law occurred regarding state relief to entrepreneurs. Actions of the government were aimed mostly at supporting pro-environmental proceedings, including encouraging companies to use renewable sources of energy. The Management Boards of Arctic Paper Mochewangen GmbH and Arctic Paper S.A. are of the opinion that the EU is likely to decide for the favorable decision for German state authorities and the companies who benefit from the support. Therefore there has

been no provision recorded in consolidated income statement for the first quarter of 2014.

## 6.2. Data comparability

In the three months period ended 31st March 2014, no changes in accounting policies occurred which would have caused changes of the comparative data.

## 7. Seasonality

The Group's activities are not of seasonal or cyclical nature. Therefore the results presented by the Group do not fluctuate significantly during the year.

## 8. Information on business segments

The principal business of the Group is paper production, which is conducted in four paper mills belonging to the Group. Because of the acquisition of Rottneros Group (holding two pulp production facilities) in December 2012, Arctic Paper Group broadened the scope of its business operations with production of pulp.

The Group identifies the following business segments:

- Uncoated paper – paper for printing or other graphic purposes, including wood-free and wood-containing. Uncoated wood-free paper can be produced from various types of pulp, with different filler content, and can undergo various finishing enhancing processes, such as surface sizing and calendering. Two main categories of this type of paper are graphic paper (used for example for printing books and catalogues) and office papers (for instance, photocopy paper, however the Group currently does not produce office papers. Uncoated paper from mechanical pulp intended for printing or other graphic purposes. This type of paper is used for printing magazines with the use of rotogravure or offset printing

techniques. The Group's products in this segment are usually used for printing paperbacks.

- Coated paper - wood-free paper for printing or other graphic purposes, one-side or two-side coated with mixtures containing mineral pigments, such as china clay, calcium carbonate, etc. The coating process can involve different methods, both online and offline, and can be supplemented by super-calendering to ensure a smooth surface. Coating improves the printing quality of photographs and illustrations.
- Pulp - fully bleached sulphate pulp and unbleached sulphate pulp which is used mainly for production of printing and writing papers, cardboard, toilet paper and white packaging paper as well as chemithermomechanical pulp and groundwood which are used mainly for production of printing and writing papers,
- Other – this segment contains results of Arctic Paper S.A. business operations

The division of business segments to uncoated and coated paper is caused by the following circumstances:

- Demand for products and its supply, as well as the products prices sold on the market are shaped by factors characteristic for each segment, including i.e. level of the production capacity in each segment,
- Key operational factors such as e.g. orders inflow or production costs level are determined by factors which are close to each other within each paper segment,
- Products produced in the Group's Paper Mills can be, with some exceptions, allocated to production in different subsidiaries within the same paper segment, which to some extent disturbs the financial results of each Paper Mill,

- Arctic Paper Group results are dominated by global market trends in terms of fluctuations of prices of paper and basic raw materials, particularly pulp, and depend on individual conditions of production subsidiaries to lesser extent.

The results of particular segments of business activity are monthly analyzed by the Group's key management personnel based on internal reporting provided by the companies. Performance is measured based on the EBITDA level. Transfer prices in transactions between segments are set on an arm's length basis as if it concerned non-related parties.

In the table below presented is the data concerning revenues and profits as well as some of the assets and liabilities. The data is divided to particular segments of the Group and refers to three months period ended 31st March 2014 and represents the situation as on 31st March 2014.

- a contingent liability on the grounds of a guarantee for FPG in favor of mutual life insurance company FRI in the amount of SEK 1,502 thousand (PLN 700 thousand) in Arctic Paper Grycksbo AB and of SEK 711 thousand (PLN 332 thousand) in Arctic Paper Munkedals AB;

- on 15th March 2012 AP S.A. granted a collateral in favor of Cartiere del Garda S.P.A - paper supplier to the Distribution Companies (Arctic Paper Sweden AB, Arctic Paper Denmark A/S, Arctic Paper Norge AS). The guarantee stands for total amount of EUR 1,000 thousand (PLN 4,171 thousand) and was valid until 28th March 2014,

- guarantees granted by the companies of Rottneros Group in the total amount of SEK 3,000 thousand (PLN 1,399 thousand),

Apart from the aforementioned guarantees, Arctic Paper Mochengwangen GmbH has a contingent liability in the amount of EUR 7,489 thousand (PLN 31,239 thousand) connected with exercising the benefit of lowered electricity costs in 2012 and 2013. Lower charges for electricity had been offered by German state authorities on the grounds of support granted to companies which used renewable sources of energy. Currently the European Union considers if such help is compliant with EU law. German government claims that no infringement of EU law occurred regarding state relief to entrepreneurs. Actions of the government were aimed mostly at supporting pro-environmental proceedings, including encouraging companies to use renewable sources of energy. The Management Boards of Arctic Paper Mochengwangen GmbH and Arctic Paper S.A.

are of the opinion that the EU is likely to decide for the favorable decision for German state authorities and the companies who benefit from the support. Therefore there has

been no provision recorded in consolidated income statement for the first quarter of 2014.
